

Manual Update for Palace Server

Locate the update file

Open up your windows explorer and navigate your way to your C Drive. Click on the folder named "*Program Files (x86)*" and find the *realbase* folder. You will then see a Palace folder that you will need to open to find the file "**RBLiveUpdate 12**".

C:\Program Files (x86)\Realbase\Palace

Double click on this and run the update on the next screen that pops up.
